#### Lesson 8

### The Scales of Words

1. In Arabic, the original letters of nouns and verbs are not less than three. The maximum number of letters in a noun is five, and four in a verb. Together with the original letters, extra letters can also be attached. At such a time, the noun and the verb can have more than five letters.

Note 1: The original letter or root letter is the one that remains in all the forms and derivations. Only in some exceptions is it deleted or changed to another letter.

The extra letter is the one that is found in one word-form but not in another, e.g. in the word (حَمْدٌ), all three letters are root letters while in (حَامِدٌ), the alif and in (مَحْمُو دٌ), the first (ع) and the (ع) are extra letters.

2. Words having three root-letters are called (ثُلاَثِيُّ), e.g. (ضُرَبَ) and (ضَرَبَ).

If they have four root-letters, they are called (رُبَاعِيُّ), e.g. (دُحْرَجَ) and (دَحْرَجَ).

#### Arabic Tutor - Volume One

If they have five root-letters, they are called (خُمَاسِيُّ), e.g. (سَفَرْجَلُ).

Words made up of only root-letters are called (مُحَرَّدٌ) while those having extra letters as well are called (مَزِيْدٌ فِيْهِ), e.g.

(مُحَرَّدٌ) is (مُحَرَّدٌ) – three root-letters without any extra letters.

is (تُكَبُّرٌ) - three root-letters with extra letters because the (ت) and (ب) are extra.

Note 2: To distinguish whether verbs (أَفعال), derived nouns (أَفعال), derived nouns (مُجَرَّدُ) or (مُجَرَّدُ) or (مُجَرَّدُ) or (مُجَرَّدُ) or (مُجَرَّدُ), the (واحد مذكر غائب) word-form of the perfect tense (واحد مذكر غائب) has to be examined. If that word-form is free of extra letters, then its derivatives and verbal noun will also be regarded as (مُجَرَّدُ), e.g. (مُجَرَّدُ) is (نُصَرَ). Hence, the

\_

<sup>&</sup>lt;sup>35</sup> These are nouns that are derived from the verb, e.g. (فَاعِلٌ) and (مَفْعُولٌ) are derived from the verb (فَعَلَ).

<sup>&</sup>lt;sup>36</sup> Plural of (مُصْدُرٌ), the infinitive.

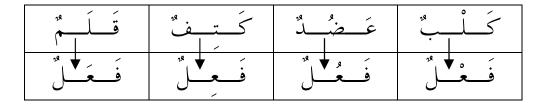

imperfect tense (المضارع) which is (يَنْصُرُ), the (المضارع), the (السم فاعل), the (السم فاعل), the (السم مفعول) which is (نُصْرَةٌ) will also (نُصْرَةٌ) will also be regarded as (ثُلاَثِيُّ مُجَرَّدٌ) although these forms have extra letters.

Similarly, in a paradigm, extra letters appear in a (مُحِرَّدٌ) word which will still remain (مُحِرَّدٌ). For example, the word (مُحِرَّدٌ) is (مُحِرَّدٌ). Therefore, (رَجُلاَنِ) and (رَجُلاَنِ) will also be (مُحِرَّدٌ).

However, (اَ كُبَرَ) and (اَ كُبَرَ) are (ثُلاَتِيُّ مَزِيْدٌ فِيْهِ). The former has one extra (ب) while the latter has an extra alif.

3. In order to determine the scales of words and to distinguish the root letters from the extra letters, the scale (ف ع ل) of (ف ع ل) is used. In triliteral words (words with 3 root letters), the (ف) represents the first radical (letter) of the word, the (ع) represents the second radical of the word and the (ل) represents the third radical of the word.

## **Examples:**

The letter that corresponds to the (ف) of the (ميزان) is called the (فَاءُ الْكَلِمَةِ), like the (قَلَمٌ), that which corresponds to the (قَلَمٌ), like the (قَلَمٌ), like the (عَيْنُ الْكَلِمَةِ) while the (قَلَمٌ) of (لَاَمُ الْكَلِمَةِ) like the (ل) is called the (لاَمُ الْكَلِمَةِ), like the (ل) is called the (قَلَمٌ), like the (و) of (قَلَمٌ).

When intending to determine the scale of (رُبَاعِيُّ) - quadriliteral (four letter) words, add two lāms instead of one after (ف) and (ع). In words with five root letters, add three lāms.

### **Examples:**

جَعْ فُرِّ	سَــــــــــــــــــــــــــــــــــــ
فَ عُلَّ الْ	فَ عَ لَ لَ لَ

4. At the time of determining the scale, the alphabets ( $\dot{\omega}$ ), ( $\varepsilon$ ) and ( $\dot{\omega}$ ) will take the place of the original letters while the other extra letters will remain as they are in their places. Examples:

ک بنار "	2	ٲۘػ۫ڹؘڔؙ	تَ کُ نِیْ اِرْ
ف ف ف	فَ عِينَ الْمُ	أُفْ عَ لَ	تَفْعِيْلُ ا

عَيْنُ ) or the (الْكُلِمَةِ), the (عَ ) or the (الْكُلِمَةِ) or the (الْكُلِمَةِ), the (عَ ) or the (الْكُلِمَةِ), the first (كَبَّرَ = كَـب ْ بَـر) while the second one is extra. According to the rule, the scale should have been (اِحْمَرً). Instead its scale is (فَعُبَل). Similarly, in the word (إِحْمَرً), the final (رَافْعُل) is extra. Its scale will be regarded as (رَافْعُلَ).

5. A great benefit of recognizing the scales of words is that by knowing the meaning of the root letters of a word, it becomes very easy to recognize the meanings of all its paradigms and derivatives.

# **Exercise No. 7**

What are the scales of the following words:

(3) شَرِيْفُ	(2) شَرَفُ اللهِ	(1) رَجُٰلٌ
(6) مُلُوْكُ	(5) مَلِكُ ّ	(4) أَشْرَافُ
(9) رَحْمَانُ	(8) رَحِيمٌ	(7) رَحْمٌ
(12) كِرَامُّ	(11) كَرِيْمُ	(10) كَرَمُ
(15) عُلَمَاءُ	(14) عَالِمْ	(13) عِلْمٌ
(18) غَضَنْفُرُ	(17) عَقْرَبُ	(16) عَالِمُوْنَ
(21) تَعْلِيْمٌ	(20) عَلَّمَ	(19) عَلاَّمَةُ
(24) إِكْرَامٌ	(23) مُتَكَبِّرٌ	(22) تَكَبُّرٌ
